

2. HJR 51 (1983) - Chesapeake Bay - Finfish

As directed by HJR 52 (1983), and the Legislative Policy Committee, the AELR Committee began its review of Fishery laws and regulations at a June 7 hearing, with a report from the Tidewater Administration of its current efforts to eliminate duplication in Title 4, Subtitle 7 of the Natural Resources Article. Senator Dorman and Delegate McCaffrey will spearhead the review and coordinate efforts with DNR to expeditiously and without duplication carry out the mandate of HJR 52 (1983).

3. Role of the Attorney General's Office

On June 28, the Chairman, Vice Chairman, President and Speaker are scheduled to meet with the Attorney General of the State concerning the role of the Attorney General in disputes arising between the legislature and executive agencies in the State. The matter of representation has become one of concern as a result of recent differences of statutory interpretation involving asbestos statutes and regulations allegedly promulgated under those statutes and as a result of the questionable promulgation of regulations by the Board of Public Works and legislation filed after AELR inquiries.

John Arnick  
Chairman - AELR Committee

Catherine I. Riley  
Vice-Chairman, AELR Committee
